SKILL BROADCASTING • SHIPPED

One dev builds a tool. The whole org gets it.

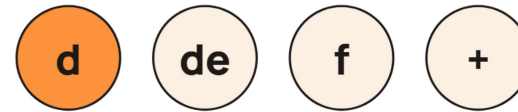

The economics of "everyone runs agents" just flipped.

BEFORE • ORG API KEY, METERED

One dev ships

NOW • PERSONAL SUBSCRIPTIONS

The whole team ships

Everyone contributes compute, not just opinions.

Review becomes the dev's only job.

Open source is the wedge. The app is the business.

The next-era metric: verified production updates shipped per day.

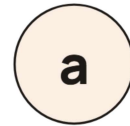

Built by the team that ships with it daily.
